Summary

I am a developer working in JavaScript, Node.js, Ruby, Ruby on Rails, MongoDB, Mongoose, React, HTML, and CSS. I have previously worked as an Apple systems administrator; this experience has enriched my current career growth. Currently I am developing a full-stack MERN app called "Cheers To You" which allows friends to send each other drinks at their favorite bar.

Technical Skills

JavaScript	Ruby	HTML5	CSS3
React/JSX	Ruby on Rails	MongoDB	Mongoose
Express	Node.js	PostgreSQL	OAuth
jQuery	git CLI/GitHub	AJAX	JSON Web Tokens

Projects

EXECUTIONER

- A hidden-character guessing game with a scary movie theme.
- This app was built with JavaScript, jQuery, HTML5, and CSS3.

TACO FINDER LA

- A crowd-sourced application to pair you with the taco of your dreams.
- This app was built with Ruby, Ruby on Rails, HTML5, and CSS3.

MEAL TICKET

- A group project app dedicated to providing an option of conveniently located restaurants and bars to meet up with your friends at before your next night out at an event. My roles were Github manager, database manager. I also helped integrate the third-party APIs utilized.
- This app was built with JavaScript, Node.js, Express, MongoDB/Mongoose, OAuth, Zomato API, Google Maps API, HTML 5, CSS 3, and Materialize.

CHEERS TO YOU

- An app to send a drink to a friend.
- This is a MERN (MongoDB, Mongoose, Express, React, and Node.js) stack app.
